## SKILLS

**Programming:** HTML, CSS, JavaScript, SASS

**Libraries & Frameworks:** React.js, Redux Toolkit, Bootstrap, Materialize CSS, Tailwind CSS

**Tools & Platforms:** Git, GitHub, Netlify, Vercel, Webpack, Babel, Firebase, Figma

**Also Familiar with:** Python, Java, PHP, T-SQL, C++

## EDUCATION

**Bachelor of Science in Computer Engineering with Specialization in Software Engineering**

*De La Salle University - Dasmariñas, Philippines*

*Graduation Date: Sep 2022*

## WORK EXPERIENCE

MTL Holdings Inc.

### Web Developer Intern

- Designed and developed a prototype website for the company.
- Collaborated with the General Manager to create engaging web content that effectively portrayed the company's mission, vision, values, and proven experience with clients in the industry.
- Utilized **HTML**, **CSS** with **Materialize CSS** framework, and **JavaScript** to develop interactive features for the prototype website and **Figma** for the web design, resulting in a user-friendly experience and visually appealing web pages.

## PROJECT EXPERIENCE

### Explora

<https://explora-ruddy.vercel.app/>

- Developed a travel booking website for a mock agency that offers tours for specific destinations in the Philippines where users could create an account through email or Gmail, choose travel packages, and leave reviews.
- Technologies & Tools:** React JS, TailwindCSS, Google Firebase, Figma

### Chapters

<https://chapters-tawny.vercel.app/>

- Developed a user-authenticated journal web app with a random quote generator and random activity suggestion feature.
- Technologies & Tools:** React JS, Redux Toolkit, TailwindCSS, Google Firebase, Axios, Figma

### CanDiY

<https://candiy-nu.vercel.app/>

- Created a single-page website UI for a candy subscription box, presenting details about the product, subscription options, pricing, and customer feedback.
- Technologies & Tools:** HTML, CSS, JavaScript, Webpack, Babel, Bootstrap, SASS, Figma

## SENIOR THESIS

### SIM Card Registration System with Report Feature

- Collaborated with team members to produce a SIM Card Registration System website along with a fingerprint hardware for capturing fingerprint data to be used for the SIM card registration process.
- Collaborated with a team member to develop the website's front-end using **HTML**, **CSS**, **Bootstrap** and **PHP**.
- Contributed to back-end development tasks, including database management in PhpMyAdmin, **SQL** query creation for retrieving data, and executed features such as account creation, authentication, and the SIM card registration function.
- Assumed a leadership role within the team by taking charge of project scheduling and effectively delegating tasks to team members, ensuring a well-organized and efficient project completion process.
